EXAMINER

NGUYEN, STEVEN H D

ART UNIT	PAPER NUMBER
----------	--------------

2665

DATE MAILED: 07/09/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/732,185

Applicant(s)

SCHILLING, DONALD L.

Examiner

Steven HD Nguyen

Art Unit

2664

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 16-50 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 16-50 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16, 20-22, 25-27, 31-33, 36-38, 42-43 and 46-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling (USP 5166951) in view of Koyanagi (USP 5291486).

Regarding claims 16, 20-22, 25-27, 31-33, 36-38, 42-43 and 46-50, Schilling discloses a communication system which a packet transmitter including a demultiplexer (Fig 2, Ref 99) for demultiplexing the encoded data into a plurality of sub data sequence (Fig 5, Ref 405), spreading-spectrum means for spread-spectrum processing each of the sub data sequence signals by respective chip sequence signal, thereby generating a plurality of spread-spectrum channels, with a respective chip sequence signal different from a each chip sequence signal in a plurality of chip sequence signals for spread-spectrum processing the plurality of sub data sequence signals, respectively, and with the plurality of chip sequence signals commonly used by the plurality of packet transmitters (Fig 5, Ref 407-408); combiner means for algebraically combining the

Art Unit: 2665

plurality of spread spectrum channels as a multichannel spread spectrum signal (Fig 2, Ref 105), transmitter means for transmitting at a carrier frequency the packet-spread-spectrum signal using radio waves over a communications channel (Col 19, lines 12-16) and memory means for storing the data is well known in the art. However, Schilling fails to disclose a header means. In the same field of endeavor, Koyanagi teaches the use of header device for adding header for a plurality of data signal (Fig 1, Ref 3).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of header device to add a packet header into a multiplexing data as taught by Koyanagi into the packet multiplexing system of Schilling in order to add the controlling information into the packet to provide a timing and controlling data to receiver, thereby, enhancing the system with higher efficiency.

4. Claims 17-19, 28-30 and 39-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling '951 and Koyanagi and as applied to claims 16, 27 and 38 above, and further in view of Schilling (USP 5260967) and Kim (USP 5619526).

Regarding claims 17-19, 28-30 and 39-41, However, Schilling '951 fails to fully disclose the claimed invention. However, the examiner takes official notice that encoder means for encoding, scrambling or encrypting is well known and expected in the art as disclosed by Schilling '967 which used an encrypt for encrypting the encoded information before transmitting (Fig 1, Ref 52) and Kim which used a scrambler for scrambling the encoded information before transmitting (Fig 1, Ref 103 and 101).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply an encoder having the function as encryption, scramble as disclosed

Art Unit: 2665

by Kim and Schilling '967 into Schilling's transmitter in order to provide security for transmitting data.

5. Claims 23-24, 34-35 and 44-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling '951 and Koyanagi and as applied to claims 16, 27 and 38 above, and further in view of Schilling (USP 5260967).

Regarding claims 23-24, 34-35 and 44-45, Schilling '951 fails to fully disclose the claimed invention. However, the examiner takes official notice that a header, which concatenates to the channels is well known and expected in the art as disclosed by Koyanagi in figured 2 wherein a packet header added into a plurality of channels, each channel contains a data packet and Schilling '967 discloses a plurality of spread spectrum channels is concatenated with a header field as sync information (Fig 8 and 10).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply a header device for generating a preamble to the channels as disclosed by Schilling '967 into Koyanagi and Schilling's transmitter in order to allow the receiver and transmitter to use the information in the header to obtain the information in the channels.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven HD Nguyen whose telephone number is (703) 308-8848. The examiner can normally be reached on 8-5.

Art Unit: 2665

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D Vu can be reached on (703) 308-6602. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.

A handwritten signature in black ink, appearing to read "Steven HD Nguyen", with a stylized flourish extending from the end.
